

SURGICAL GOWNS

ABOUT PENNINE

Pennine Healthcare is proud to be one of the UK's leading, employee owned, manufacturer and distributor, of single use, sterile Ward & Theatre Consumables and Custom Procedure Packs, and since our incorporation in 1963, the business has grown year on year. We market our products and services in over 50 countries worldwide and employ around 200 people at our purpose-built premises in Derby.

In line with our ISO 13485 accreditation, Pennine has a policy of continual improvement in order to meet the needs of the changing global standards for sterile, single use medical devices. Continual investment in people, training, and technology, has enabled us to provide an increasingly wide range of user friendly, high specification products. We also promote standards of safety, health, and welfare to provide a healthy and safe working environment.

Our vision will be delivered by supplying world class products and delivering distinctive customer service supported by a culture of continuous

improvement in investing in our people. Our core skills in manufacturing and engineering make us competitive through technological innovation, enabling us to be innovative, flexible and responsive, supplying healthcare organisations and businesses across the globe with the highest quality British manufactured products.

Pennine Healthcare is also proud to be one of the leading suppliers of PPE into healthcare settings, and as a hospital focussed company, we sell directly to healthcare professionals in all areas, including intensive care and operating theatres. In 2014 Pennine Healthcare saw the need to develop a range of PPE and Infection Control products, due to a lack of complete, high quality products available for the general public, and thus ARMA was born.

We hope you find what you are looking for in the following pages of this brochure, but if you do not, please do not hesitate to get in touch. We're a friendly bunch and love speaking to new, and old, customers alike.

OUR SURGICAL GOWNS

Our ARMA gowns offer superb quality, performance and variety, to keep you and your patient safe and we always strive to achieve the following in our Surgical Gown range:

CHOICE

We know that all clinicians and procedures are different, that's why we offer an extensive choice of fabric options and reinforcements to meet the demands of our customers.

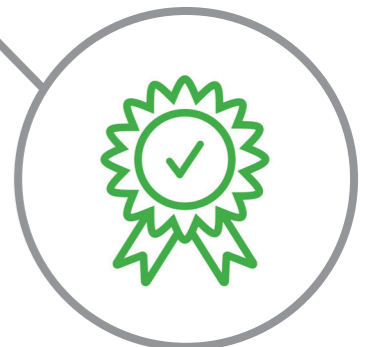

PROTECTION

Our surgical gowns offer unbeatable protection. Each gown meets or exceeds the minimum performance requirements of the EN13795 standard*, whilst of course being latex free. What's more, our SMS gowns have an alcohol repellent treatment to enhance protection.

PERFORMANCE

Comfort and ease of use are vitally important, and we strive to achieve both in all our gowns. Our soft cuffs and long velcro fastenings allow for enhanced fit and comfort, even in the longer procedures, whilst our use of high-tech fabrics keep you dry.

SPEED

Our gowns are housed in a dispenser box, making it quick and easy to store and use when the time comes. All our gowns feature colour coding and ARMA transfer tabs as standard. Our gown packs also include two different sized, absorbent, hand towels.

* Class 1s - In compliance with standard EN13795. The EN13795 is the European harmonized standard specifying requirements for single-use and reusable covering (i.e. surgical gowns, surgical drapes) used as medical devices for patients, clinical staff and equipment and intended to prevent the transmission of infective agents between patients and clinical staff during invasive surgical procedures.

NON-REINFORCED GOWNS

EFFECTIVE AND AFFORDABLE

Sterile gowns are used during surgical procedures to protect both the patient and operating room personnel from the transfer of micro-organisms, body fluids and particulate material. This is a disposable garment.

- A standard performance gown in accordance to EN13795
- Non-Woven SMS
- Soft, comfortable Spunlace
- Includes two hand towels
- Velcro neck fastening
- Rose neck band
- Soft white cuffs
- Latex Free
- SMS material is anti-static and alcohol repellent

*SMS fabric pictured

A GUIDE TO SURGICAL GOWNS

We want to make it as easy as possible for you to choose the correct gown you need. This table shows the recommended gown for every surgery, based on the type and length of the procedure, amount of fluids and required comfort.

SURGICAL PROCEDURES	Non-Reinforced	Fabric-Reinforced	Poly-Reinforced
	Non-surgical procedures	✓	
Endoscopy	✓		
Cannulation procedures	✓		
Minor surgery	✓		
Ophthalmic	✓		
Minimally invasive surgery	✓	✓	
ENT	✓	✓	
Cardiology	✓	✓	
Head & Neck	✓	✓	✓
Vascular		✓	✓
Cardiac surgery		✓	✓
General Abdominal		✓	✓
Urology		✓	✓
Gynaecology		✓	✓
Obstetrics		✓	✓
Orthopaedics		✓	✓

**Gown recommendations in product table supplied by Pennine Healthcare's Clinical Consultant.

SMS VS SPUNLACE FABRICS

SMS: Available in Standard and High Performance gowns, our SMS gowns are Spunbond Meltblown Spunbond. Made from non-woven polypropylene fibres, these gowns are lightweight and comfortable.

Spunlace: Available in Standard and High Performance gowns, Spunlace is made from non-woven wood pulp/polyester fibres. Soft for increased comfort, our Spunlace gowns are suitable for most procedures.

NEED MORE INFORMATION?
